

UNI 3

Data sheet – Dimensions

SILVER –

Tap connection

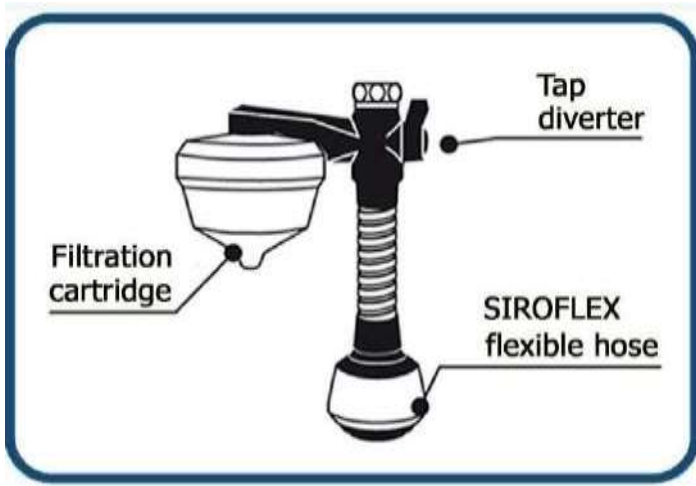

It fits every tap with the most common 22x1 mm Male and 24x1 mm female threads. The adapter for the Female thread, two washers with different thickness (1 and 2 mm) and the membrane water saver are included in the package.

CAUTION: depending on the thread length of your tap, a greater thickness may be necessary to avoid water leaks. Simply place the additional 1mm washer, or water saver, under the stainless steel screen washer, placed in the ring nut to be screwed to the tap. A similar situation occurs when the adapter must be used to fit the water filter to the tap with a female

thread. Here, too, the watertight seal is guaranteed by inserting the additional 1 mm washer, or the water saver, under the screen washer.

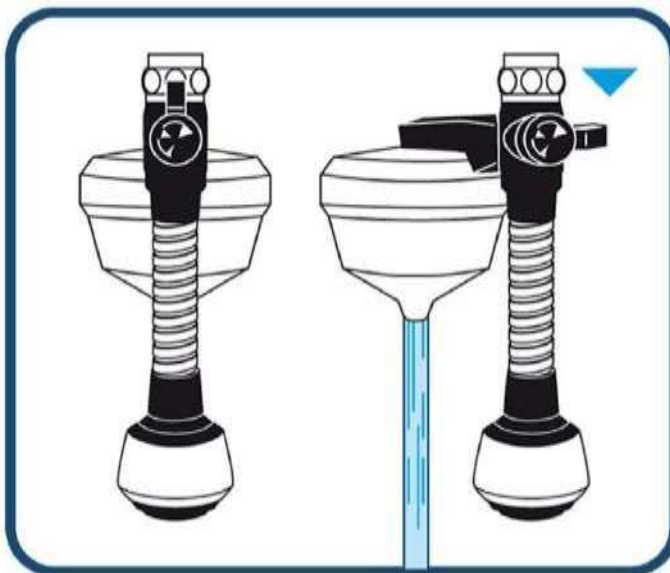

Check if the 2 mm washer is inserted in the upper part of the adapter, otherwise place it: this ensures the watertight seal inside the female thread of the tap.

Structure of the appliance

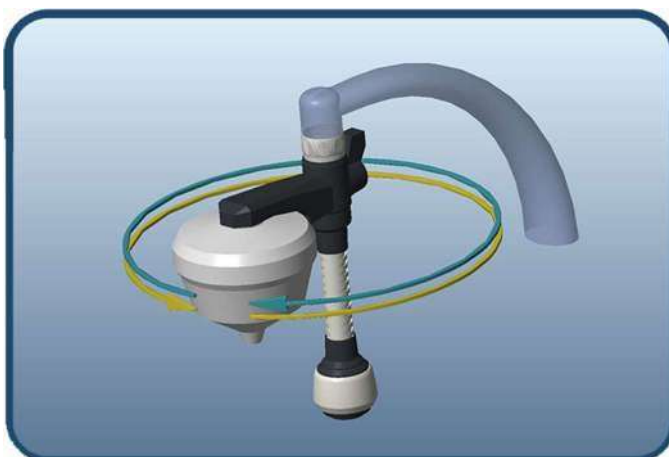

The device consists of:

- an arm with a filtration cartridge and a tap sprayer hose, which has to be connected to the tap;
- a tap diverter to turn on/off the filtering function.

Tap diverter

The tap diverter allows the use of the filtering function only when needed.

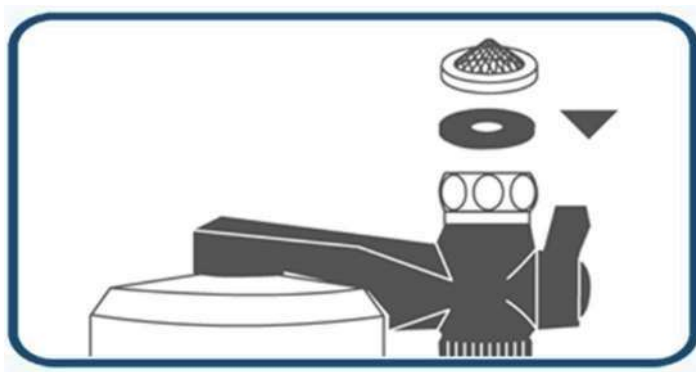

Free rotation

UNI3 is adjustable (as it rotates on itself in both directions) to direct the jet of filtered water where it is most convenient for the user

Removable water saver

The insertion of the membrane water saver under the screen washer allows a water saving up to 40%

Screen washer cleaning

The stainless steel screen washer retains the solid impurities present in the water and therefore needs to be cleaned periodically.

Package contents

In the package you will find:

the water filter body with the unfitted hose

- one washer with a thickness of 2 mm.
- one washer with a thickness of 1 mm.
- One membrane water-saver
- One adapter for Female thread
- Adhesive label to indicate the expiry date (3 months)
- Instructions for use

Package

The water filter will be delivered to you inside its box.
